BREWING MACHINES

BEAN2CUP

COFFEE MACHINES

Enjoy the invigorating fresh coffee experience at the touch of a button. The Bean2Cup machines of Coffee Day deliver hot beverages as you like it anytime, anywhere!

The simple, user-friendly controls allow you to enjoy speciality coffees like cappuccino, latte and espresso at the push of a button. Each steaming cup of coffee is made from the finest hand-picked and expertly roasted beans from Coffee Day's very own plantations. Along with coffee, we serve a wide range of teas and plenty more delicious beverages.

QUALITY

Coffee Day always aims at serving you the best coffee experience. Our quality experts strictly monitor all processes involved, right from planting coffee bushes to dispensing the beverage in your cup. The roasted coffee beans used with the machines are packed in aluminum pouches fitted with Goglio valves to preserve the aroma and freshness by restricting the inflow of air.

OUR STORY

Coffee Day is Asia's largest integrated coffee company. Coffee Day Group grows coffee in its own estates of about 15,000 acres. Apart from this, the group also sources coffee from 11,000 small growers.

Coffee Day is one of India's leading coffee exporters with clients across America, Europe, the Middle East and South East Asia.

- First consolidated and pure coffee outlet to find its footprints outside India
- A heritage of over 140 years
- Asia's largest integrated coffee company with the second largest network of coffee estates
- One of the top coffee exporters in India – to all major continents of the world
- First company in India to receive UTZ certification for responsible coffee production

Coffee Day is synonymous with excellent, aromatic coffee brewed to perfection in each of the retail formats. Led by its flagship brand, Café Coffee Day, the group follows a multi-format retail strategy that captures almost the entire coffee consumption basket with divisions like Coffee Day Xpress, Coffee Day Beverages, Coffee Day Fresh & Ground and Coffee Day Exports. Each division runs as independent units, yet rolls back into the same entity.
